SUMMARY

Senior Front-end Engineer with over 8 years of experience in building enterprise web applications using Angular, Vue.js, TypeScript, JavaScript, HTML5 and CSS3.
Experienced in frontend architecture, responsive web design, cross-browser compatibility, reusable component development, code review and technical mentoring within Agile environments.
Strong background in leading frontend feature delivery and collaborating with cross-functional teams across government, retail, education and e-commerce domains.
Actively leverage AI coding tools such as Claude Code, GitHub Copilot and ChatGPT to accelerate development, testing, debugging and documentation.

EXPERIENCE

Senior Front-end Engineer

FPT Software **March 2021 - October 2026, HCM city**

- Owned frontend feature delivery from requirement analysis through production deployment using Angular, Vue.js, TypeScript, HTML5, CSS3 and SCSS.
- Led end-to-end frontend feature delivery, from requirements analysis and implementation through testing and production deployment.
- Led technical discussions and proposed frontend solutions for complex business requirements across multiple projects.
- Designed and implemented reusable UI components, responsive layouts and cross-browser compatible interfaces.
- Conducted code reviews and provided technical guidance to junior and mid-level developers to ensure code quality and maintainability.
- Collaborated closely with UI/UX designers, backend engineers, business analysts and project managers to deliver features within sprint schedules.
- Participated in estimation, sprint planning and task breakdown activities to support project delivery.
- Contributed to frontend architecture improvements, performance optimization and engineering best practices.
- Mentored junior developers and contributed to knowledge sharing and frontend engineering best practices within the team.
- Currently building side projects with AI-assisted development workflows.
- Identified UX bottlenecks and proposed improvements that reduced user effort and improved workflow efficiency.
- Collaborated with business stakeholders to understand user needs and translate it into technical solutions.
- Spearheaded the adoption of agentic workflows and AI-assisted development tools to streamline code generation, testing, and documentation processes.

Middle Front-end

ORIENT Software **October 2019 - March 2021, HCM city**

- Developed web, desktop and mobile applications using Angular, TypeScript, HTML5, CSS3 and NativeScript.
- Owned the development and release process of POS application modules for production deployments.
- Designed and implemented responsive user interfaces and integrated backend APIs to support business workflows.
- Applied reusable component architecture and frontend best practices to improve maintainability and scalability.
- Participated in technical discussions, code reviews and solution design activities.
- Collaborated with cross-functional teams to deliver project milestones on schedule.

Junior Front-end

FPT Software **August 2017 - October 2019, HCM city**

- Developed code based on UX/UI designs for both admin and user interfaces.
- Collaborated with the Back-End Team to integrate business logic with code implementation.
- Investigated and researched solutions to enhance user experience, user interface, and functionality.
- Executed the deployment and release of the application.

PROJECT

NewKong2: Government Civil Management System (Japan)

FPT Software • December 2024 - Present

- Developed and maintained enterprise-scale government administration modules using Vue.js.
- Collaborated with UI/UX designers to translate Figma designs into responsive and cross-browser compatible interfaces.
- Reviewed pull requests, provided technical guidance for a team of 4–6 frontend developers and enforced coding standards across the development team.
- Coordinated frontend development activities and supported task estimation and sprint planning for the frontend team.
- Partnered with stakeholders to define requirements, evaluate trade-offs and deliver user-focused solutions..

- Contributed to performance optimization and frontend architecture improvements for a nationwide citizen management platform.
- Leverage AI-powered development tools to accelerate coding, assist with debugging, conduct code reviews, and improve code quality and development efficiency.

Costco Average Weight (Jul 2024 – Nov 2024)

FPT Software

- Served as frontend feature owner for multiple business modules using Angular 10 and TypeScript.
- Designed reusable UI components and implemented responsive layouts across multiple business modules.
- Developed reusable UI components using Angular Material and Angular component architecture.
- Conducted code reviews and mentored team members to ensure code quality and consistency.
- Collaborated with stakeholders to analyze requirements and deliver features on schedule.
- Investigated and resolved complex frontend issues related to performance, maintainability, and user experience.

Classpad (Oct 2022 – Jul 2024)

FPT Software

- Build responsive web interfaces optimized for desktop, tablet, and mobile devices.
- Implemented Angular components following reusable and maintainable architecture principles.
- Collaborated with designers to ensure consistent user experience across multiple screen sizes.
- Participated in requirement analysis, estimation, development, testing, and deployment activities.
- Participated in code reviews and provided technical support for junior developers.
- Collaborated with business stakeholders to clarify requirements and ensure successful feature delivery.

Buyer Red Line (Mar 2021 – Oct 2022)

FPT Software

- Developed and maintained business-critical modules using AngularJS and Angular 10.
- Participated in the migration and enhancement of legacy AngularJS components to modern Angular architecture.
- Implemented responsive and cross-browser compatible user interfaces using HTML5, CSS3 and TypeScript.
- Build reusable components and shared modules to improve maintainability and development efficiency.
- Conducted code reviews and enforced frontend coding standards across the team.
- Developed and executed unit tests using Jasmine and Karma to ensure application stability and code quality.
- Collaborated with backend engineers and business analysts to deliver features within sprint timelines.
- Investigated and resolved complex production issues while maintaining application performance and reliability.

Retail DDS (Oct 2019 – Mar 2021)

ORIENT Software

- Developed and maintained retail management web applications using Angular and TypeScript.
- Designed and implemented responsive user interfaces optimized for desktop and tablet environments.
- Developed POS desktop application features and supported deployment activities for production releases.
- Built mobile POS functionalities using NativeScript to support retail operations on handheld devices.
- Collaborated with backend teams to integrate APIs and business workflows.
- Applied component-based architecture and reusable design principles to improve maintainability and scalability.
- Participated in code reviews and technical discussions to ensure code quality and consistency.
- Troubleshoot and resolved application defects while supporting ongoing feature enhancements.

ODMS (Jul 2017 – Oct 2019)

FPT Software

- Developed user-facing modules for operational data management and reporting.
- Translated UX/UI designs into responsive web interfaces using AngularJS, HTML5 and CSS3.
- Collaborated with backend engineers to integrate APIs and business processes.
- Participated in application deployment and release activities across multiple environments.
- Researched and proposed UI/UX improvements to enhance usability and user experience.
- Maintained and enhanced existing features while resolving application defects and performance issues.

EDUCATION

Software engineering

HUTECH University • HCM city • 2017

CERTIFICATIONS

PSM1

PSM2

SKILLS

Front-end: AngularJS , Angular , Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS.

Testing: Unit Test (Jasmine, Karma)

Tools: Jira, Rally, GIT

Languages: English

UI Frameworks: Bootstrap, Angular Material.

State Management: RxJS, NgRx.

Design Tools: Figma

Backend Knowledge: C#, .NET, NodeJs

Database: SQL Server, PostgreSQL, mongoDB, mySQL

Methodologies: Agile/Scrum, Waterfall

AI-Assisted Development: Claude Code, Github copilot, Cursor, ChatGPT, AI-assisted code review.
